1996 - 1998	(ZG)	Grand Cherokee (International Markets)
1994 - 1998	(ZJ)	Grand Cherokee/Grand Wagoneer

NOTE: **AW-4 (Asian Warner) transmissions are now included in this Service Bulletin. ATF+4® is recommended for AW-4 (Asian Warner) transmissions**

NOTE: This Service Bulletin DOES NOT apply to the following transmissions:

- Sprinter transmissions
- Crossfire transmissions
- MK/PM vehicles equipped with Continuously Variable Transmission (CVT)
- **WG vehicles equipped with a diesel engine (sales code ENF) and a W5J400 or NAG1 transmission (sales code DGJ)**
- ****ALL vehicles equipped with a AS68RC Transmission (sales code DG3)****
- ****ALL vehicles equipped with a GENTRAG MPS6 Transmission (sales code DG5)****

DISCUSSION:

ATF+4® - (Type 9602) is being used as factory fill for Chrysler Group automatic transmissions. **ATF+4® is recommended for all vehicles equipped with Chrysler Group automatic transmissions EXCEPT FOR THOSE LISTED IN THE NOTE ABOVE.**

NOTE: ATF+4® must always be used in vehicles that were originally filled with ATF+4®. DO NOT USE ANY OTHER FLUID.

NOTE: ATF+4® is backward compatible with ATF+3 , ATF+2, and ATF+. Additionally, ATF+4® can be used to top off vehicles that used ATF+3, ATF+2, or ATF+.

NOTE: If ATF+4® is used to service models originally filled with ATF+3 , ATF+2, and ATF+ the fluid maintenance schedules listed for that model does not change. The service interval currently in effect for a given model should continue to be followed. Refer to the Service or Owners manual for maintenance schedule directions.

In general terms, If ATF+, ATF+2 or ATF+3 was the recommended fluid, it is now recommended to use ATF+4®

BENEFITS

- Better anti-wear properties
- Improved rust/corrosion prevention
- Controls oxidation
- Eliminates deposits
- Controls friction
- Retains anti-foaming properties
- Superior properties for low temperature operation

FLUID COLOR

Mopar ATF+4® has exceptional durability. However, the red dye used in ATF+4® is not permanent; as the fluid ages it may become darker or appear brown in color. ATF+4® also has a unique odor that may change with age. **With ATF+4® fluid, color and odor are no longer indicators of fluid condition and do not necessarily support a fluid change.**

PARTS REQUIRED:

Qty.	Part No.	Description
AR	05013457AA	Fluid, Transmission, ATF+4® (Type 9602), Quart
AR	05013458AA	Fluid, Transmission, ATF+4® (Type 9602), Gallon
